Introduction

Beat Constructor is a large collection of distinct and highly inspiring sounds for professional rhythm composition. Aimed at those who seek something different than overused samples of old vinyl and vintage drum machines, Beat Constructor has been created totally from the ground up, delivering fresh and never-heard-before sounds.

This library brings 600 samples which include everything the most demanding music-making lover needs: loads of kicks, snares, hats, drums, percussion, as well as a wide range of effects, hits, scratches, lo-fi glitches, noises, vocoder sounds and way beyond. With such a variety of all-new material, Beat Constructor is a complete tool for making beats and breaks with a lot of original character.
