Introduction

Overview

The Fantom-G Sound Expansion series is a wide collection of instruments, loops and kits developed to take full advantage of the amazing power and flexibility of these monster-synths, giving you instant inspiration and refreshing air for brand new ideas. Backed up by our vast and deep experience in sound design specifically for Roland equipment, this expansion series delivers unique, rich materials with superb quality and playability - all ready to shake the floors and top the charts.

It's a whole new music performance and production environment with the sound of tomorrow - already available to you today.

What is a Sound Expansion?

The Fantom-G allows you to load a lot of sounds in addition to the factory presets, greatly increasing it's creative potential. Just drag and drop the Sound Expansion project files onto your Fantom-G's USB drive, and you can use them just like normal patches and kits on either keyboard or pads.

The Libraries

Analogies

Genuine analog bass, synth, lead and pad sounds. Contents: **330 original samples, 25 multisampled instruments, 42 patches.**

Installation and Usage

Loading the projects

To load the expansions into your Fantom-G, you need to simply copy the supplied project files onto a USB flash drive:

- Unzip the files you've downloaded from the Sinevibes web site or the distributor store.
- Insert the USB flash drive into the USB connector on your computer.
- Open the USB from your desktop or in the media devices list.
- Drag and drop the project folders onto the USB drive.
- Right-click the USB drive icon and select "eject".
- Insert the USB drive into your Fantom-G.
- Press MENU, choose "Project", then "Load Project". Select the sound library you wish to load, and press F8.

Using the sounds

After you load a project, you can access the sounds by pressing the F1 Patch List button to select a patch or a sample set, or F5 LiveSet List to select a live set. View the following table to see what types of sounds are available in each of the Sound Expansions:

	Samples	Multi-samples	Patches	Sample Sets	Live Sets

Re-arranging sounds

You can use the Fantom-G librarian software to arrange sounds from multiple sound libraries into one, or copy the patches you like into existing projects of yours. Please note that this only works with projects that do not use samples - at the moment, samples need to be copied manually.

- Launch the Librarian application on your computer.
- Open the `fangsnd.svd` files from the selected sound library projects (they reside in the `SND` subfolders). You can manipulate them directly from your USB drive.
- In the "Mode" toolbar selector, choose "Patch" or "Sample Set".
- You can now simply copy/paste single or multiple sounds between the SVD banks.
- When done, perform the "Save" procedure from the "File" menu on the SVD files you modified.
- If you copied sounds that make use of samples (they're only in Drums, Organics or Loops expansions), make sure to copy the samples from the source project as well (they are stored in the `SMPL` subfolders).

Notes

- If you see "v/s" or "dyna" in the patch name, it means "velocity switching" or "dynamic". This patch reacts to velocity in a special way, so that you will hear different sounds depending on how hard you play.

License

Introduction

The Fantom-G Sound Expansions are not “sold” but “licensed” to you. What this means in plain words is you are totally free to use the sounds to make music, but you can't re-distribute them in any form.

By using the Fantom-G Sound Expansions from Sinevibes, you accept the terms of this license agreement.

Scope of this license

This license applies to any and all files and materials featured in the Fantom-G Sound Expansion libraries (further referred to simply as “Sound Library”).

License terms

- All materials included in the Sound Library are copyright 2004-2008 Artemiy Pavlov, all rights reserved.
- You are allowed to use the Sound Library and all of it's materials to compose original music for both non-commercial and commercial purposes, including, but not limited to, creation of melodies, mixes, compositions, jingles, soundtracks and the like.
- You can freely modify, process and tweak the Sound Library's materials to fit your musical needs.
- Redistribution of the Sound Library materials in any way, by any means, on any media, in whole or part, in any form is strictly prohibited.
- Creating derivative sound libraries anyhow based on any part of the Sound Library is strictly prohibited.

Warranty

- The manufacturer guarantees that the Sound Library is a completely original work, not violating any laws, and not based on any illegal material.
- Although you will almost surely found our sounds awesomely useful, the manufacturer gives no guarantee for them to fit any particular purpose.

- The manufacturer shall have no responsibility in regard to any damage which may happen during the Sound Library installation or use, including, but not limited to, steps taken due to misinterpretation or misunderstanding of the instructions given in this manual.
- The manufacturer is not obliged to keep support and provide future updates for the Sound Library, except for fixes for issues of corrupt data or improperly working sound materials.

Transferability

- You are free to transfer this license (i.e. sell the Sound Library) to any person, provided that no copy of any materials of the Sound Library remain at your side.
