

Blend v2 by Sinevibes

AAX + AU + VST effect plugin for Mac/Windows/Linux

Version 2.1.4

- Added VST3 version for Linux
- Added a workaround for an audio framework bug in macOS 10.9-10.12
- New, more modern and future-proof preset manager backend
- Updated AAX framework
- Built against a newer JUCE 7 framework

Version 2.1.3

- Improved DSP engine initialization scheme to eliminate extra computational load during the start of processing
- Improved handling of the host transport state information
- Fixed clicks that could be produced by the LFO when it's in sync mode and the host transport is playing in a loop

Version 2.1.2

- Chorus modulation phase offsets now remain mutually in sync when the voice count parameter is changed

Version 2.1.1

- Improved mathematical precision of the modulation generator
- Balance and sound quality enhancements in multiple existing factory presets
- Added new factory presets

Version 2.1.0

- Added ability to sync the modulation generator rate to host tempo
- Added new factory presets

Version 2.0.3

- Added AAX and VST3 versions for Windows
- Added shortcut button to show the "open file" dialog with the list of preset banks
- Added ability to reduce the window size down to 80%

- Fixed an issue that in very rare cases could cause the preset name and the toggle buttons to abruptly lose their correct styling
- Fixed permissions issue in the package installer that could in very rare cases cause the presets to not be readable by the plugin

Version 2.0.2

- Added support for tail time property
- Improved visual response for knobs with stepped values

Version 2.0.1

- Added all-new factory presets
- Minor design enhancements for knobs and text labels
- Improved behavior when receiving the reset() call from the host
- Added a workaround for a UI size bug in macOS Big Sur
