

Inertia v3 by Sinevibes

AAX + AU + VST effect plugin for Mac/Windows/Linux

Version 3.1.0

- Thoroughly reworked step sequencer algorithm with more robust handling of rapid parameter changes, as well as new fundamentals for future functionality
- The plugin now precisely follows the tempo changes (including automation), re-synchronizing itself to the DAW transport location
- Changed the value range of the sequencer swing parameter to a more mathematically balanced range: 25 to 75%
- Multiple user interface design enhancements
- Added new factory presets and reworked existing factory presets

Version 3.0.2

- Added a safety feature in case if the host application doesn't reset the plugin state before playback (this could have caused a loud click when opening the plugin in some VST3 hosts)

Version 3.0.1

- Improved behavior and performance in all lag filters
- Added new factory presets
