

Switch v3 by Sinevibes

AAX + AU + VST effect plugin for Mac/Windows/Linux

Version 3.2.0

- Thoroughly reworked step sequencer algorithm with more robust handling of rapid parameter changes, as well as new fundamentals for future functionality
- The plugin now precisely follows the tempo changes (including automation), re-synchronizing itself to the DAW transport location
- Updated color scheme to be consistent with other sequencer-based plugins
- Updated design for the rate selector and the step tie switch
- Added new factory presets

Version 3.1.3

- Added a safety feature in case if the host application doesn't reset the plugin state before playback (this could have caused a loud click when opening the plugin in some VST3 hosts)

Version 3.1.2

- Added support for mouse wheel events in sliders and sequencer rate selector
- Added new "reverse" function in the utility menu
- Improved utility menu design; additional layout centering fix on Linux
- Improved behavior and performance in all lag filters
- Added new factory presets

Version 3.1.1

- Fixed an issue that prevented the "Loop Region" pattern utility button from working
- Added new factory presets

Version 3.1.0

- Completely redesigned user interface with a new color scheme, improved controls and enhanced layout
- Added ability to edit the pattern steps beyond the end step marker
- Added new "Trim" pattern utility function: resets all steps beyond the end step marker
- Added new factory presets, reworked existing factory presets
- Now requires macOS 10.13 or later on Mac computers

Version 3.0.1

- Added VST3 version for Linux
- Added a workaround for an audio framework bug in macOS 10.9-10.12
